High performance

NEW

MCLAREN 720S GT3

NSR philosophy is always the same: making amazing **"High-performance"** slot cars 1:32 with the best quality on the market. **"100% Made In Italy"** ensure a meticulous attention to all details.

McLaren 720S has massive technical features of a pure racing car: power 720 hp (720S name comes from here), weight only 1283 kg, top speed 341 km/h and it goes from 0 to 100km/h in only 2,8 seconds.

NSR did a great job of research and development to make the 1:32 model very fast on track.

McLaren 720S will be a very hard rival also for the high-performance models of the **NSR GT3** category.

NSR started the **McLaren** project in 2016 with the 650S, but it was deleted for missing the official license.

Now we are proud to officially announce that 720S will be under **official McLaren license!**

FACTORY

World Champions from 1997

NSR is an Italian artisan Company making professional slotcars 100% here in Italy, into its factory. New factory opened in mid 2010. It displays over 1.100 square meters; it is a building realised with modern techniques in a total respect of health and environment.

It is very comfortable, the walls are totally temperature insulated by aluminium padded panels, all the rooms where fellow workers assemble cars and parts, have controlled temperature by automatic power inverters as well as powerfull aspirators for the welding smoke.

There are photovoltaic panels laid on top of the roof to produce over 100.000 KW/year green power energy to totally satisfy our internal power need.

Inside the NSR factory work only young people, dynamic and motivated, enough to say that the average age it is of 22 years!

NSR makes highly performing model cars, a technological concentration of parts to be competitive straight out of the box.
